WHY XINGON? BECAUSE WE ARE THE PRO'S CHOICE!

You can count on Xingon to deliver superior climbing equipment. When it's time to climb, the pros look to Xingon for the solution.

Focusing on end users' needs drives Xingon's success. Our entire product design process—from engineering to manufacturing—creates a climbing system that ensures productivity, durability, and safety for the user. Xingon is preferred more than any brand because innovation, safety, and durability are built into every product.

PRODUCTIVITY

Xingon designs products that increase productivity. For example, multi-functional tops on stepladders and comfortable “D” shaped rungs on extension ladders increase efficiency to get the job done in less time.

DURABILITY

A heritage of products developed to meet the rugged demands of the professional, Xingon ladders have a reputation of being the most durable ladders on the jobsite. Solid solutions for any job.

SAFETY

In control throughout the manufacturing process, Xingon uses the highest grade materials to design our products. The result is safe, quality climbing equipment that users have come to know and expect.

FULL LINE

Xingon manufactures a full line of professional products, specialty ladders and scaffoldings.
