

## BASIC INFORMATION

Product Number : XG-880V

Product Name : Step Ladder- drilling machine

**Proprietary product parameters confidential, order to contact our company specially customized**

The XG-881 series hermitage ladder assembly machine produced by our factory is specially designed and developed for the industry peers, used in the assembly process of the product hermitage ladder series, mechanical realization: from the discharge of materials, positioning, drilling, rivets and other integrated workflow. Greatly increase the production efficiency of the product, as well as the stability of the production process of the product, so that the product production and processing industrialization, greatly reduce the labor loss.
