

Highly durable and offering superior strength Combining a host of added features and benefits.

XINGON customized, can be customized according to actual needs, the following parameters are for reference only,

do not represent the actual product, specific parameters according to the design drawing

The XG-883 series Die Spotting Machine produced by our factory is specially designed and developed for the peers in the industry. It is used in the mold opening operation machinery of aluminum profile mold to realize the integrated workflow such as mold release, positioning, rotating shaft and mold opening. The equipment has successfully solved the drawbacks of mold separation in the industry and solved the safety hazards of mold workers; Improve the work efficiency of mold workers: promote the production capacity of extrusion work: increase the stability of the mold separation process, so that the mold is not easy to damage: reduce the manual loss in the mold separation process
